### Functional Block Diagram

## DESCRIPTION

The RS2G07 dual buffer and driver is designed for 1.65V to 5.5V  $V_{CC}$  operation.

The RS2G07 device is open drain and can be connected to other open-drain outputs to implement active-low wired-OR or active-high wired-AND functions. The device is fully specified for partial-power-down applications using  $I_{off}$ . The  $I_{off}$  circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

The RS2G07 is available in Green SOT23-6 and SC70-6 packages. It operates over an ambient temperature range of -40°C to +125°C.
